

CCA Crowdfinance Indices

Methodology

Powered by Crowdfund Capital Advisors

May 2026

I. Overview

A. Summary

The CCA Crowdfinance Indices (the “Indices”) measure the capital-raising activity of U.S. private companies that publicly raise capital under Regulation Crowdfunding (“Reg CF”). The Indices are calculated daily from capital commitments recorded on Crowdfund Capital Advisors’ (“CCA”) **CCLEAR** market-data platform, and classify issuers according to CCA’s proprietary private-company taxonomy. The base period for the Indices is January 1, 2020 (= 100).

Each index is an **aggregate activity index**: on each calculation day it sums a chosen capital measure across **all** actively listed issuers in the relevant universe and rebases the total to 100 at the base date. Because the Indices aggregate the entire eligible population rather than a fixed number of top constituents, they reflect the breadth of the market and move up and down with genuine changes in capital-raising activity.

B. The Index Family

The family comprises a flagship composite plus seven sector indices:

- **CCA Crowdfinance Composite** — all qualifying Reg CF issuers.
- CCA Crowdfinance Technology Index (TMT)
- CCA Crowdfinance Healthcare & Life Sciences Index
- CCA Crowdfinance Food & Beverage Index
- CCA Crowdfinance Consumer & Retail Index
- CCA Crowdfinance Fintech & Financial Index
- CCA Crowdfinance Energy & CleanTech Index
- CCA Crowdfinance Real Estate & Construction Index

Each index is published in two readings: an **Activity (flow)** reading — the headline barometer — and a **Capital Formed (cumulative)** reading. See Section III.

II. Universe & Classification

A. General Eligibility

An issuer is eligible for the Indices if, on the calculation day, it:

- is a U.S. company (principal place of business in the United States);
- is actively listed on the CCLEAR platform (leading intermediaries currently include Wefunder, StartEngine, DealMaker, Republic, and Honeycomb);
- is publicly raising capital under Reg CF (including offerings conducted concurrently with Rule 506(c)); and
- is an operating company (investment funds are excluded).

The eligible universe is defined by offering type. Reg CF accounts for substantially all (~99%) of platform activity; stand-alone Rule 506(b)/506(c) and Reg A+ offerings are **excluded** because their large, lump-sum commitments are not representative of crowdfinance activity and would distort the measure. The included offering types are:

Offering type	Included
Reg CF	Yes
Reg CF & Reg D (Rule 506(c))	Yes
Reg CF & 506 D (Rule 506(c))	Yes
Side by Side	Yes
506(b), 506(c), Reg A+ (stand-alone)	No

B. Sector Classification

Issuers are classified by CCA's industry taxonomy and mapped to one of seven sector families. An issuer is assigned to the family of the industry in which it has raised the most capital to date.

Sector index	CCLEAR industries
Technology (TMT)	Technology & Software; Telecommunications & Media; Space Technology & Exploration; Automotive & Smart Mobility
Healthcare & Life Sciences	Healthcare, Biotechnology & Life Sciences
Food & Beverage	Food Service & Restaurants; Beverages; Agriculture & Food Technology
Consumer & Retail	Consumer Goods & Retail; Apparel & Fashion; Luxury Goods & Services; Sports & Fitness; E-Sports & Gaming
Fintech & Financial	Financial Services; Blockchain & Cryptocurrency
Energy & CleanTech	Energy & Utilities; Environmental & Clean Technology
Real Estate & Construction	Real Estate & Construction

C. Active Listing

An issuer participates in an index on a given day while it is actively listed: from the first to the last day on which CCA records qualifying capital commitments for the issuer (plus a short grace window), and provided the offering has not been withdrawn. Because the Indices are aggregates, there is no fixed constituent count — every actively listed issuer in the universe contributes.

D. Other

CCA reserves the right to exclude any otherwise-eligible company for any lawful reason, including insufficient internet presence, an under-developed website, or an insufficient business description. Such determinations are within CCA's sole discretion.

III. Index Methodology

A. The Capital Measure

For each issuer, recorded committed capital is the sum of qualifying commitment records on CCLEAR. Qualifying records exclude (i) Rule 506(c) parallel rows and (ii) amounts already counted in a prior offering, so that capital is neither double-counted nor inflated. Each index is computed on one of two measures of that capital:

- **Activity (flow) — headline.** Each issuer's new commitments over the trailing 90 days. This measures the current pace of capital formation and rises and falls with the market.
- **Capital Formed (cumulative).** Each issuer's committed capital to date. This measures cumulative capital raised and is, by construction, non-decreasing.

B. Index Construction

On each calculation day t , an index equals the aggregate of its measure across all actively listed issuers in the universe, divided by the aggregate on the base date, scaled to 100:

$$Index(t) = (\sum value_i(t) \text{ over active issuers}) / Base \times 100$$

The aggregate construction uses no fixed top-N membership, no divisor, and no periodic reconstitution. This is deliberate: aggregating the full eligible population avoids the selection and rebalancing distortions that affect small fixed-count indices, lets the level reflect both market breadth and intensity, and allows the Indices to fall as well as rise.

C. Base Period

Each index is set to 100 on January 1, 2020. Reg CF became effective in May 2016; January 2020 is used as the first established-market anchor. A sector index is launched once it first has sufficient breadth of actively listed issuers; history is available from the platform's earliest records.

IV. Index Policies

A. Calculation Timetable

The Indices are calculated daily, Monday through Friday, excluding U.S. market holidays: New Year's Day; Martin Luther King, Jr. Day; Washington's Birthday; Good Friday; Memorial Day; Juneteenth; Independence Day; Labor Day; Thanksgiving Day; and Christmas Day.

B. Maintenance

The Indices are maintained by CCA. Methodologies may change at any time without notice; changes are reflected in this document, and the most-recent update date is shown on the cover.

C. Recalculation

Although reserved for extraordinary circumstances, CCA may recalculate the Indices to correct any error or omission that could materially affect their value or composition. Recalculation decisions are within CCA's sole discretion.
